

# “FROM TEACHER TO LEARNING EXPERIENCE DESIGNER”

FACULTY DEVELOPMENT WORKSHOP

20  
26

For MBBS,  
Nursing, Pharma,  
Dental and AHP  
Colleges

**DR CARLOTA ALONSO** (Spain)  
Medical Doctor, Educator & Healthcare Strategist

# PROGRAM

## WORKSHOP HIGHLIGHTS

- Interactive teaching demonstrations & simulations
- Ready-to-implement classroom and clinical teaching strategies
- AI tools for educators and assessment design
- Competency-based education & feedback frameworks

TIME	SESSION
09:15 – 10:00	The New Healthcare Learner
10:00 – 10:45	High-Impact Teaching Strategies
11:15 – 12:00	Clinical Teaching & Student Engagement
12:00 – 12:45	Assessment, Feedback & CBME
13:15 – 14:00	Communication & Classroom Dynamics
14:00 – 14:45	AI, Technology & Future Faculty Skills
15:15 – 16:00	Personal Branding for Faculty
16:00 – 16:45	Continuous Learning & Development

## WHY UNIVERSITIES ARE SEEKING THIS WORKSHOP

Traditional faculty development programs often remain theoretical and disconnected from the realities of modern healthcare education. This workshop helps institutions equip faculty with practical teaching tools, improved student engagement strategies and future-ready educational approaches aligned with evolving healthcare learning environments.

- Designed specifically for Indian health sciences institutions
- Dynamic, practical and implementation-focused
- Can be customised for institutional needs

**Participants will leave saying:  
“I can implement this tomorrow.”**

# ENQUIRE NOW!

This workshop is designed to break away from traditional theory-heavy faculty development programmes and immerse participants in a **highly practical**, dynamic, and real-world **learning experience**.

Focused on the realities of **Indian health sciences education**, the session equips faculty with immediately **implementable strategies** to improve teaching effectiveness, student engagement, clinical instruction, communication, assessment, and classroom management.

## Transform your faculty. Elevate your institution's standard of healthcare education.

Equip your faculty with hands-on, high-energy strategies they can apply to clinical instruction, assessment, and modern classroom dynamics immediately.

Rather than simply discussing educational concepts, participants will actively experience modern teaching methodologies through interactive activities, simulations, role-plays, case discussions, and hands-on teaching labs that can be **directly applied from the very next day**.

Delivered by **Dr Carlota Alonso**, a Spanish medical doctor with a unique multidisciplinary journey — an MBBS graduate, **emergency medicine doctor**, and aesthetic medicine consultant who transitioned into international healthcare education, leadership, and large-scale medical training. Having worked across clinical medicine, postgraduate medical education, healthcare leadership, and healthcare workforce development, Dr Carlota brings a practical understanding of both the challenges faced by modern faculty and the **evolving expectations of today's healthcare students and institutions**.
